

Data Analyst BootCamp

Tableau

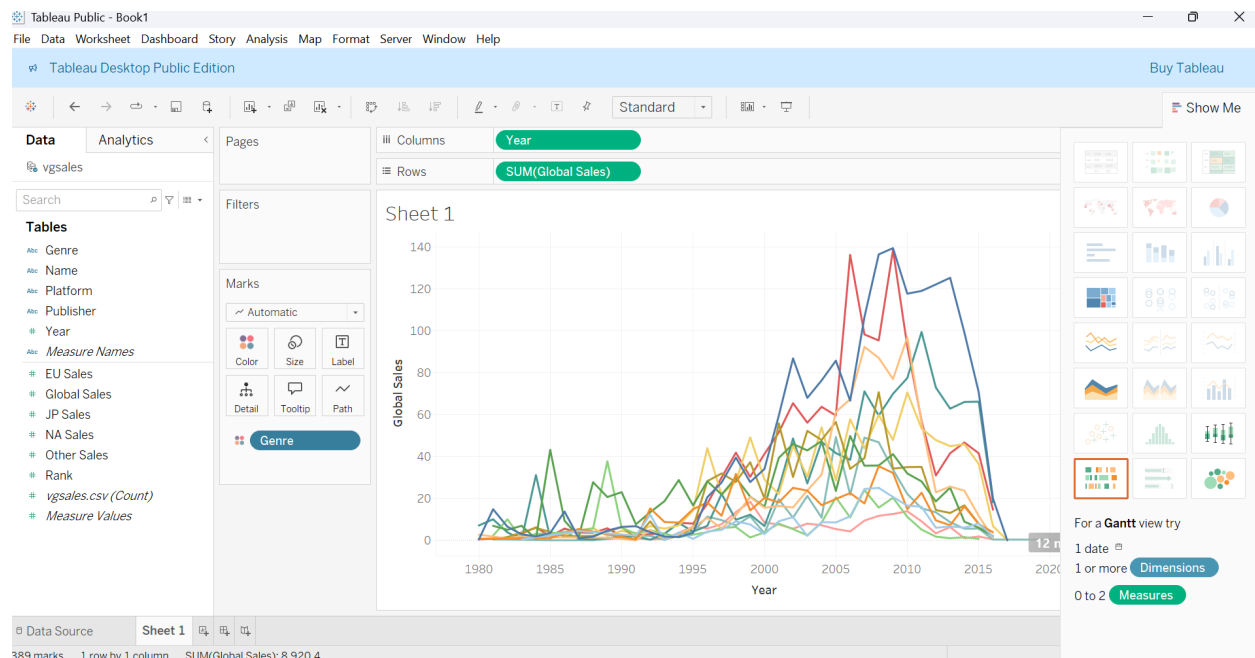

download tableau:[Link to download](#)

Kaggle dataset:[Dataset Link](#)

now open kaggle

open text document and open that csv file which u downloaded

down sheet → click on worksheet

select data from side and put into rows/cols as per ur wish we put genre into marks and beside genre there is color option we used it

add filter and choose accordingly as per work required

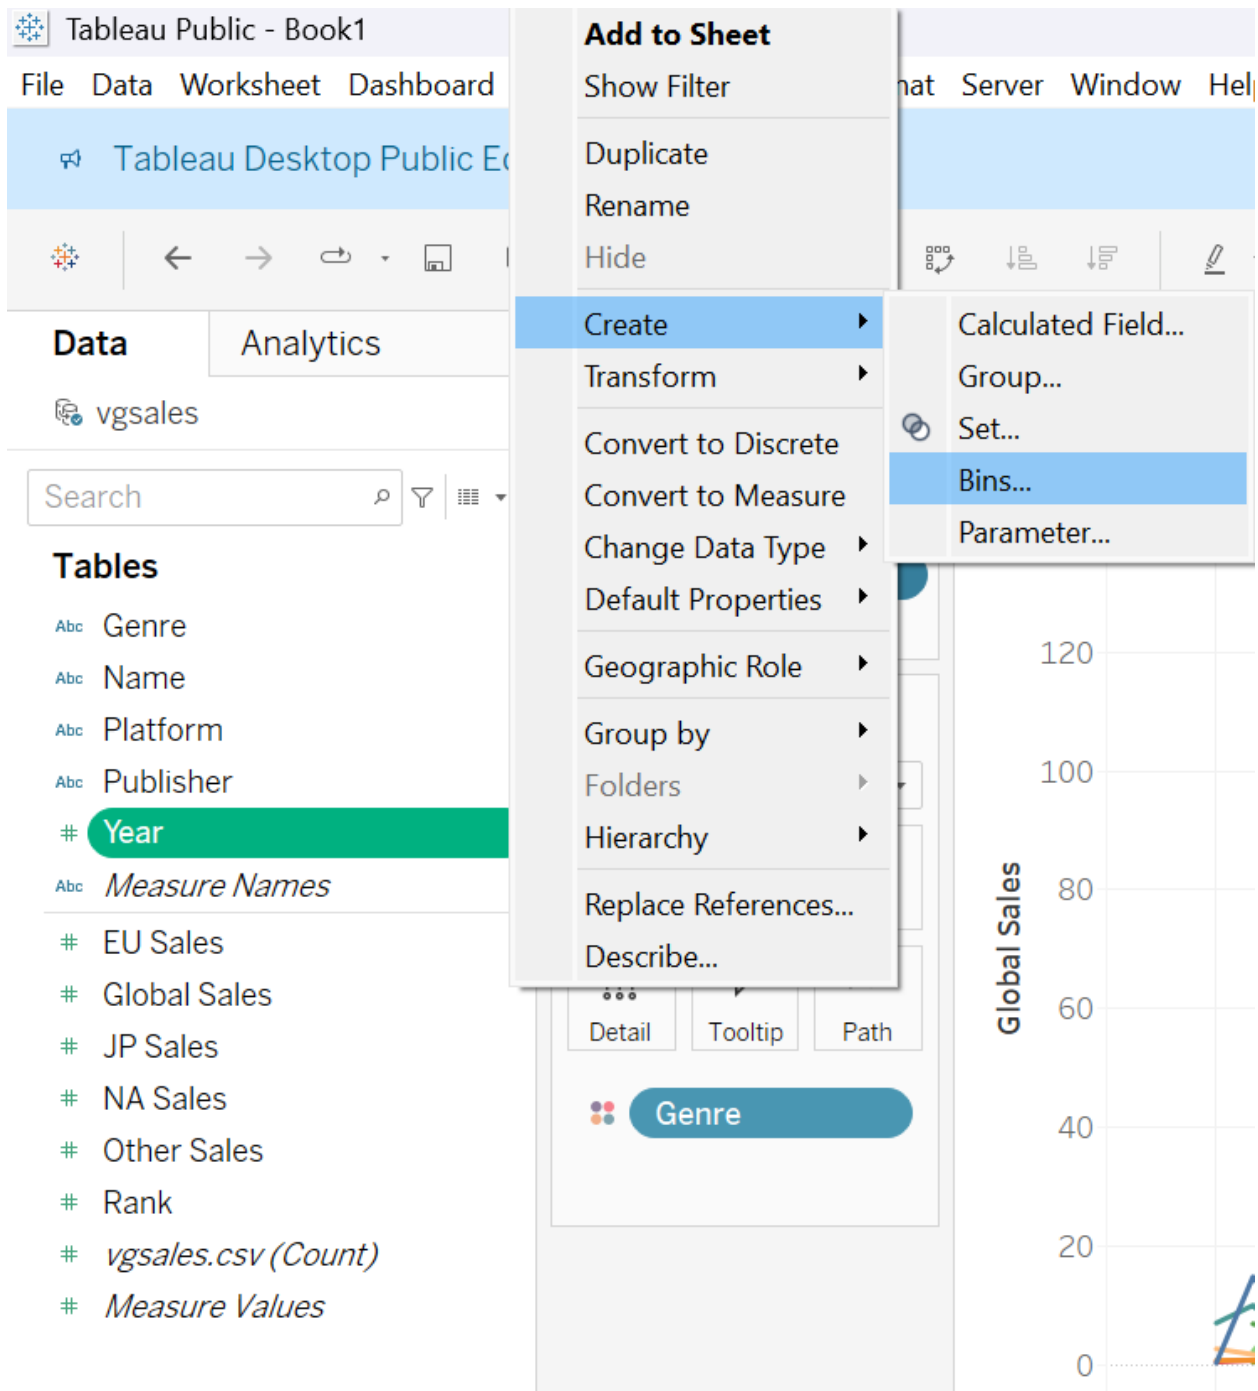

create a new worksheet and add descending order/ascending order option there on top

click on dashboard down and act accordingly

usage of calculated fields and bins in Tableau

Bins: groupings and creating ranges

Edit Bins [Year]

×

New field name:

Year (bin!)

Size of bins:

5

▼

Suggest Bin Size

Range of Values:

Min:

1980

Diff:

40

Max:

2020

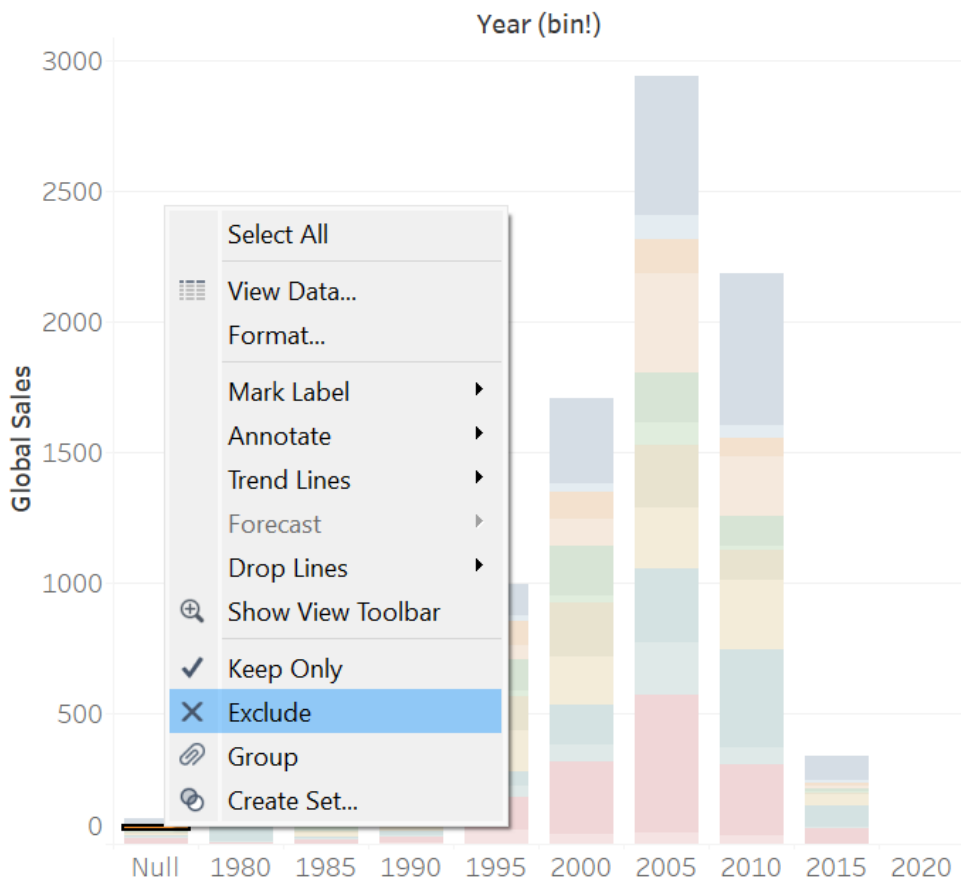

CntD:

40

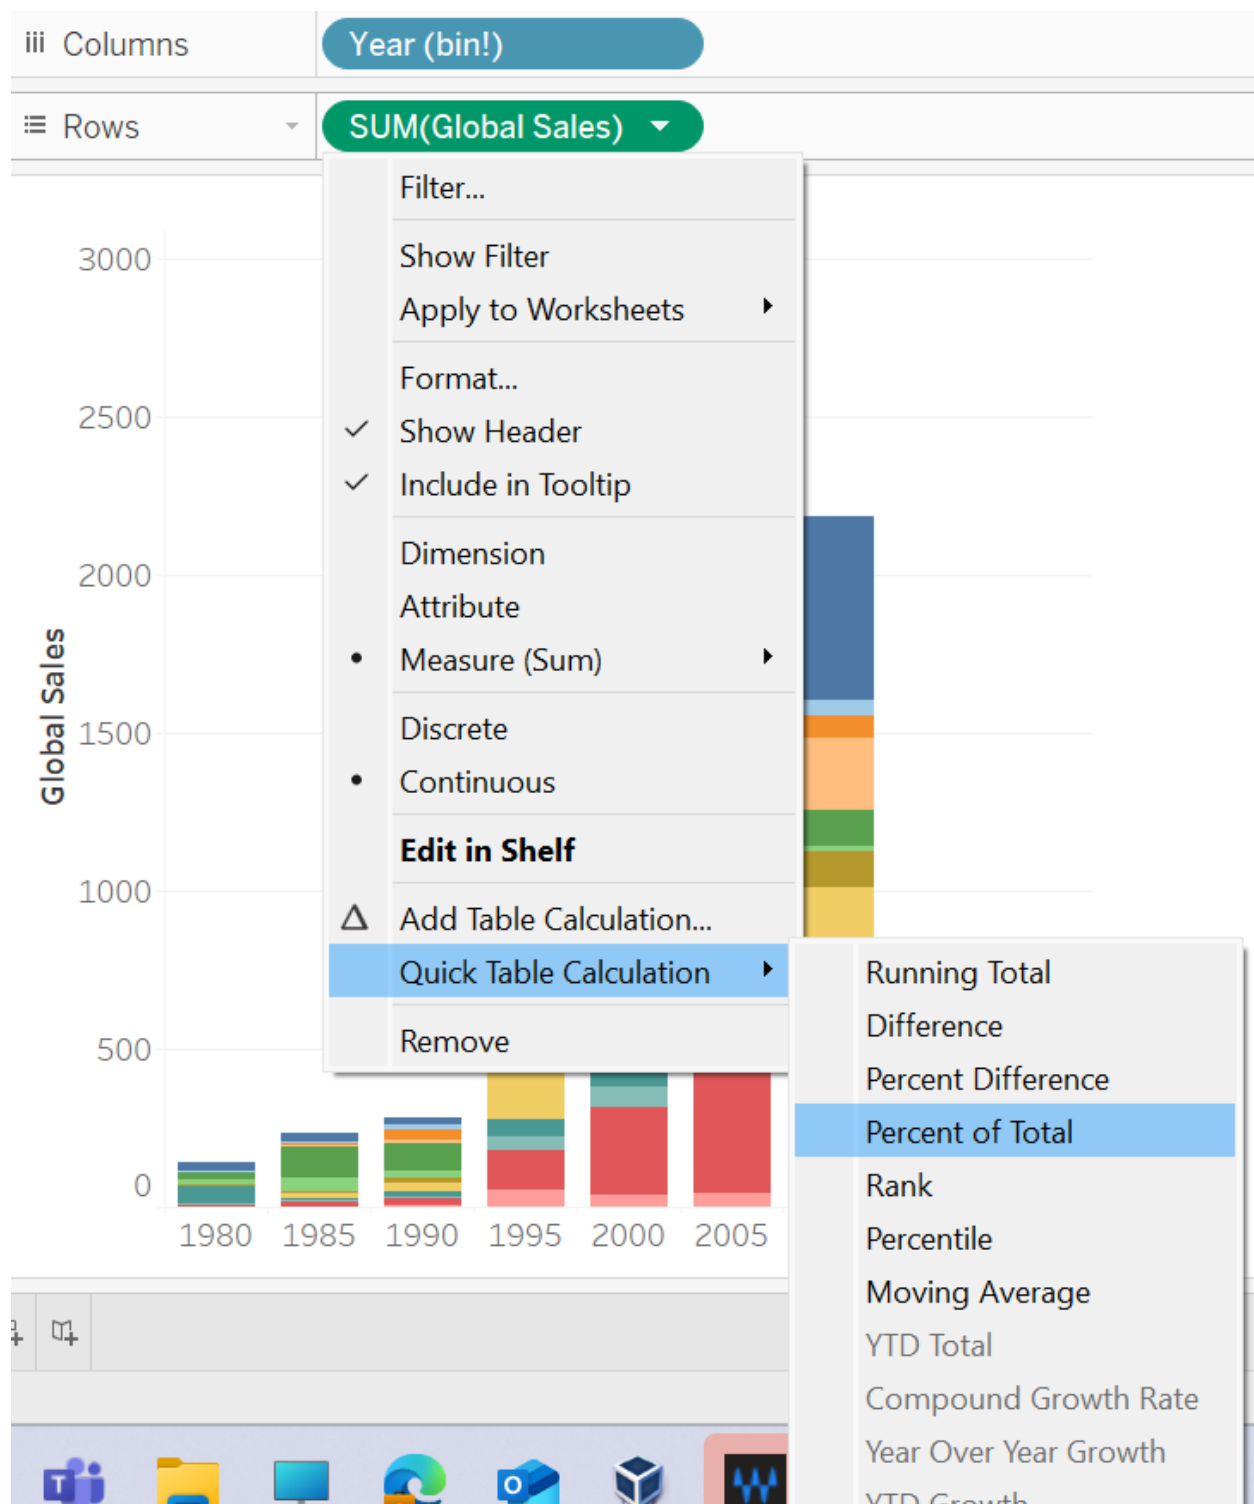

OK

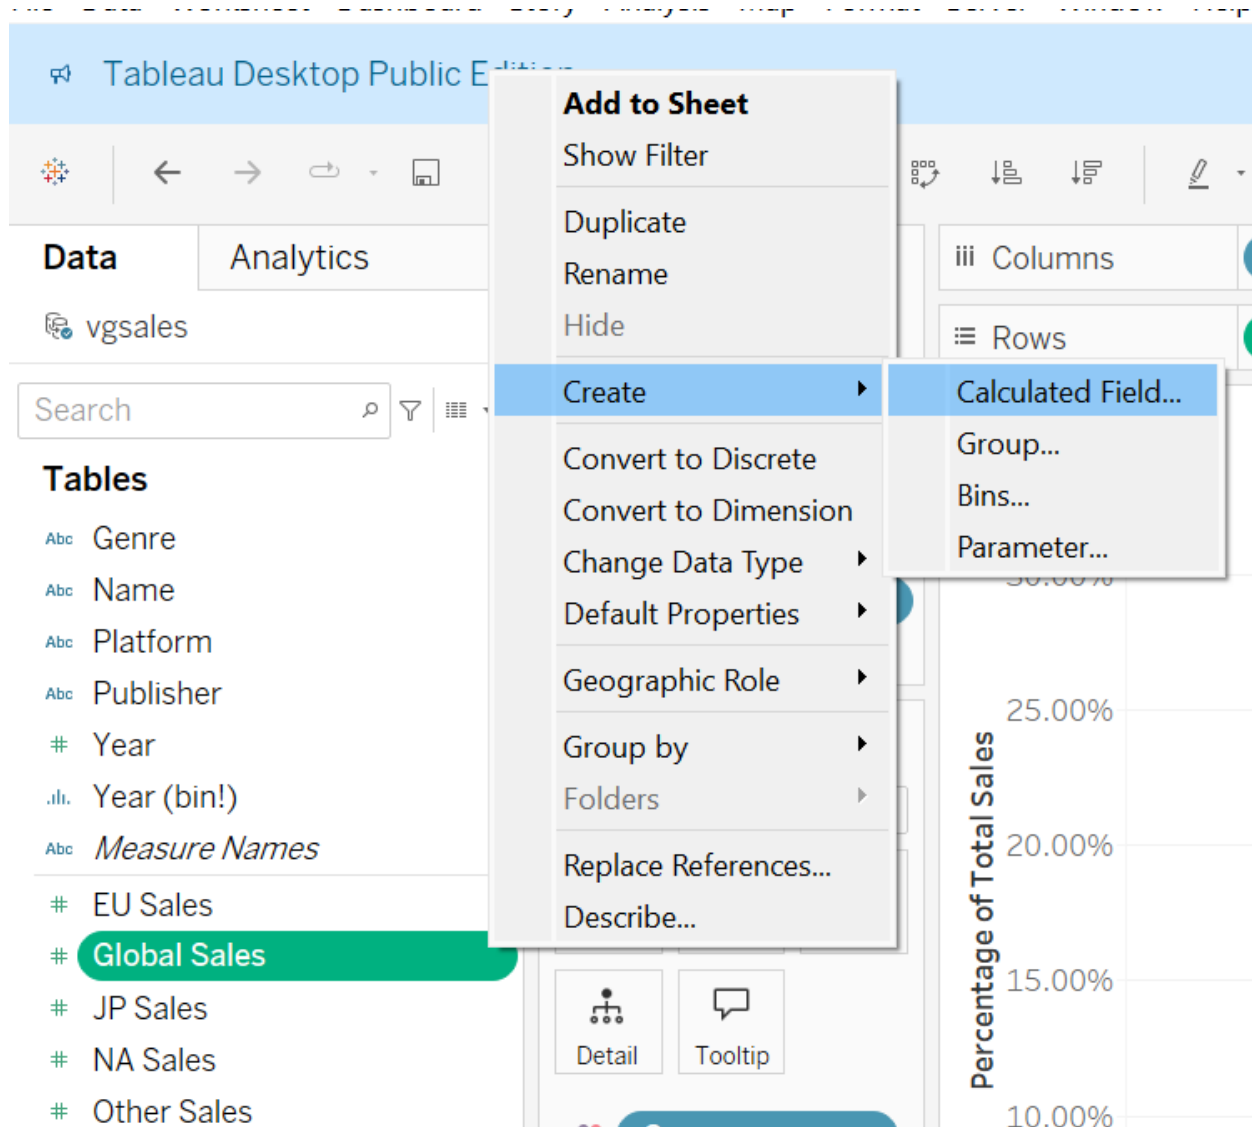

Cancel

Columns	Year (bin!)
Rows	SUM(Global Sales)

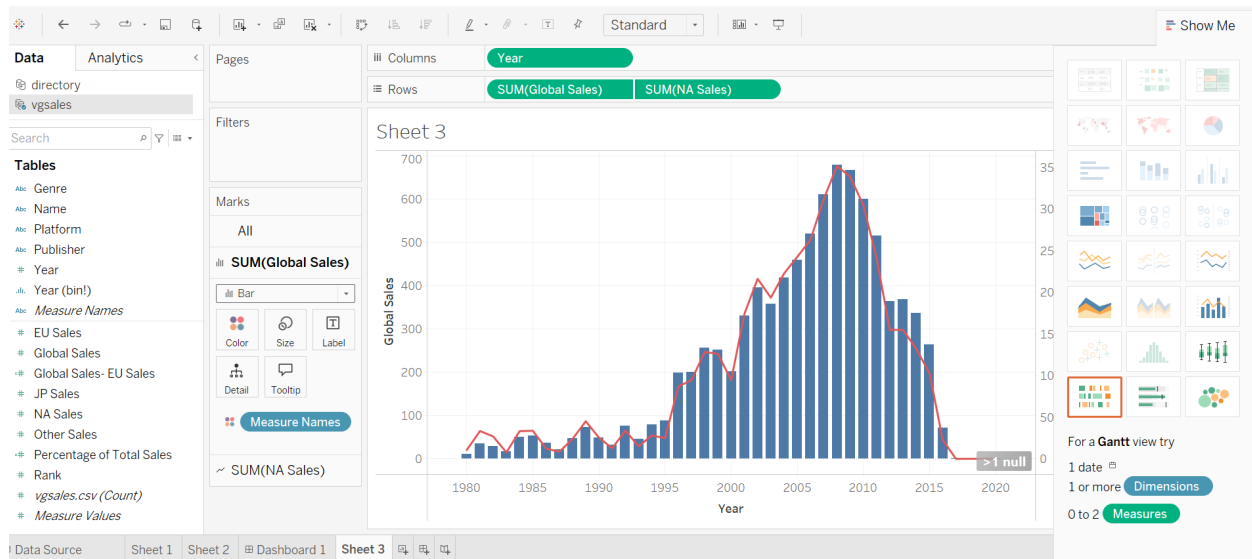

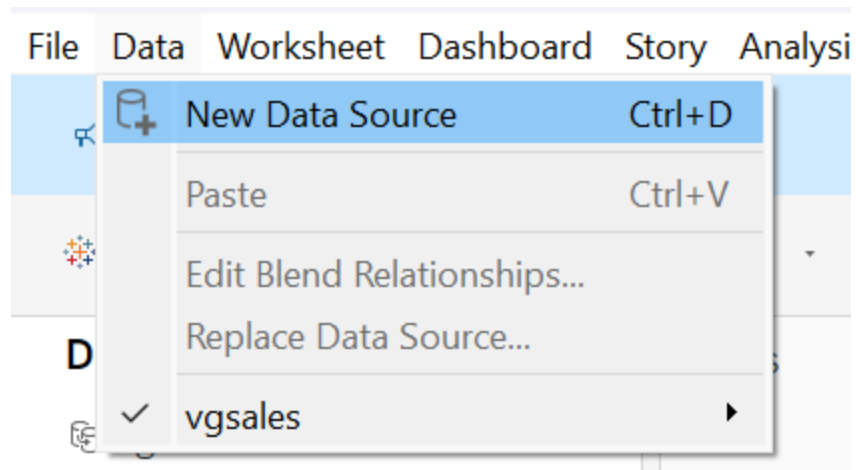

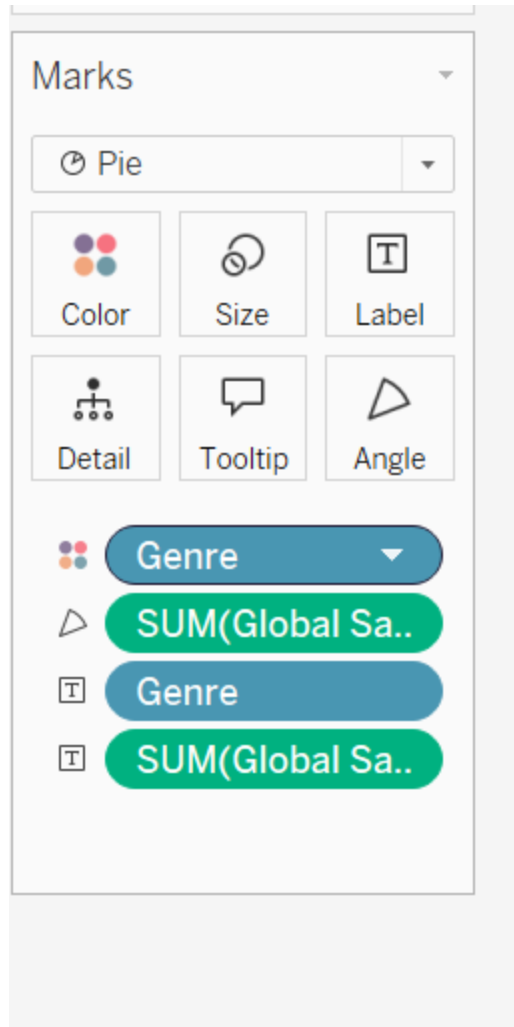

in calculate field do anything u want and work on it

Create Visualizations:

dealing with diff data so create a new worksheet and then do this

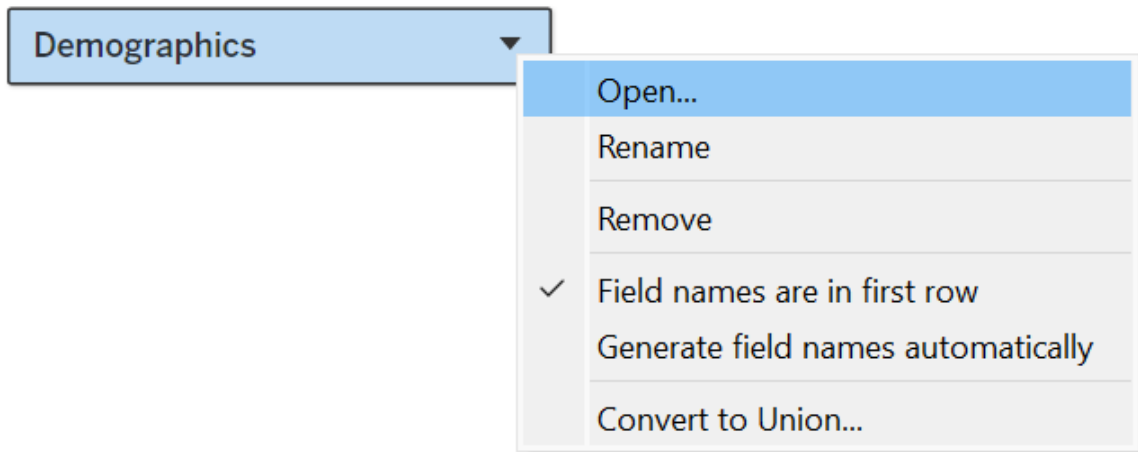

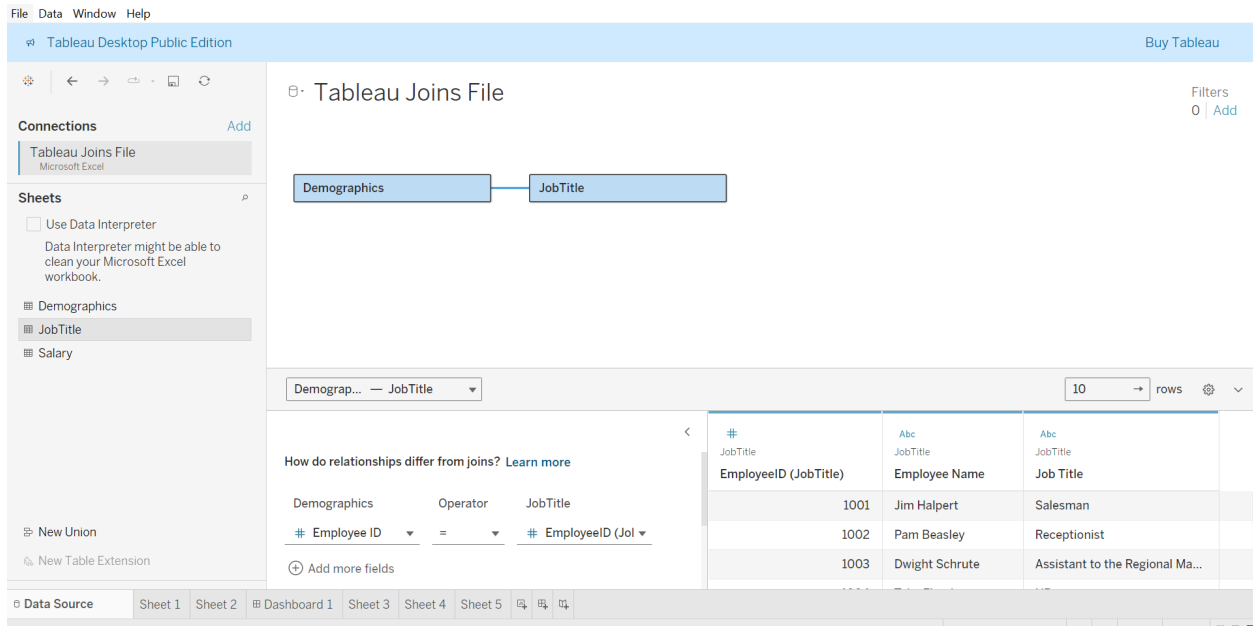

select graph and work accordingly in terms of color graph what do u want like that

add here and choose graph and click on left and click on label to get the label

Joins in Tableau:

Demographics is made of 2 tables. ⓘ

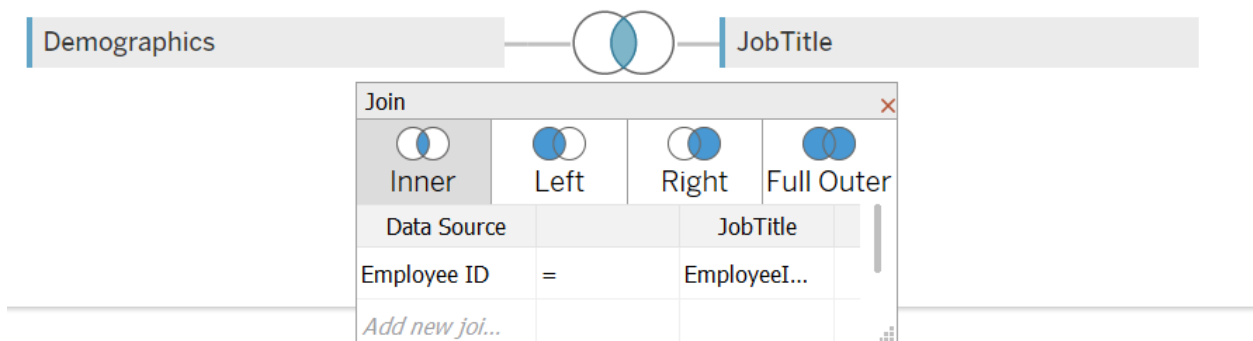

Tableau Joins File

Filters 0 | Add

Demographics is made of 2 tables. ⓘ

Demographics JobTitle

Join

Demographics Inner Left Right Full Outer

Data Source Employee ID = Includes all values in right table and all matches from left table. Members without matches will show up as nulls on the left.

Add new join...

10 rows

Name Demographics

Type	Field Name	Phys...	Rem...
#	Employee I	Demo...	Empl...
Abc	Nameof En	Demo...	Name...
#	Employee /	Demo...	Empl...
Abc	Emolovee (Demo...	Empl...

EmployeeID (JobTitle)	Employee Name	Job Title
Male	1001	Jim Halpert
Female	1002	Pam Beasley
Male	1003	Dwight Schrute
Male	1004	Toby Flenderson
Female	1005	Angela Martin
Male	1006	Michael Scott
Female	1007	Meredith Palmer

u can do inner join, left join, right join, full outer join based on requirement and also u can change based on employee id, employee name u should join and also u can do = or ≤ or ≥ instead of = always

Demographics is made of 3 tables. ⓘ

u can add 3 tables

as u done joins this thing also changes

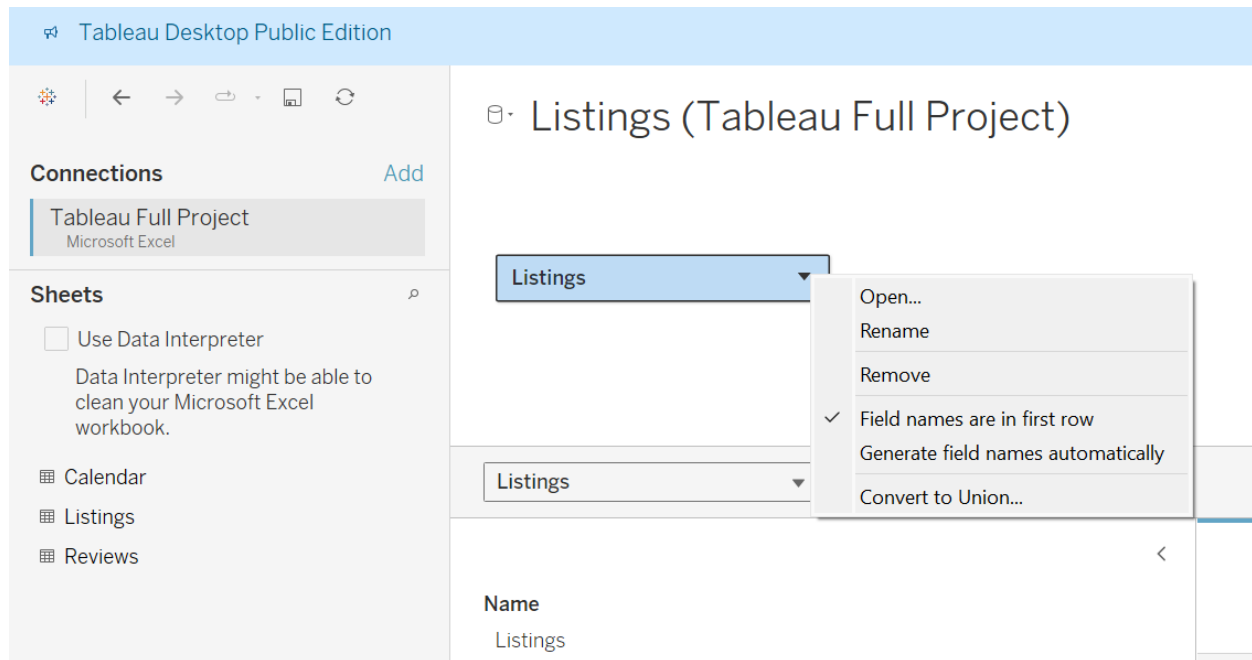

Data Analyst BootCamp

14

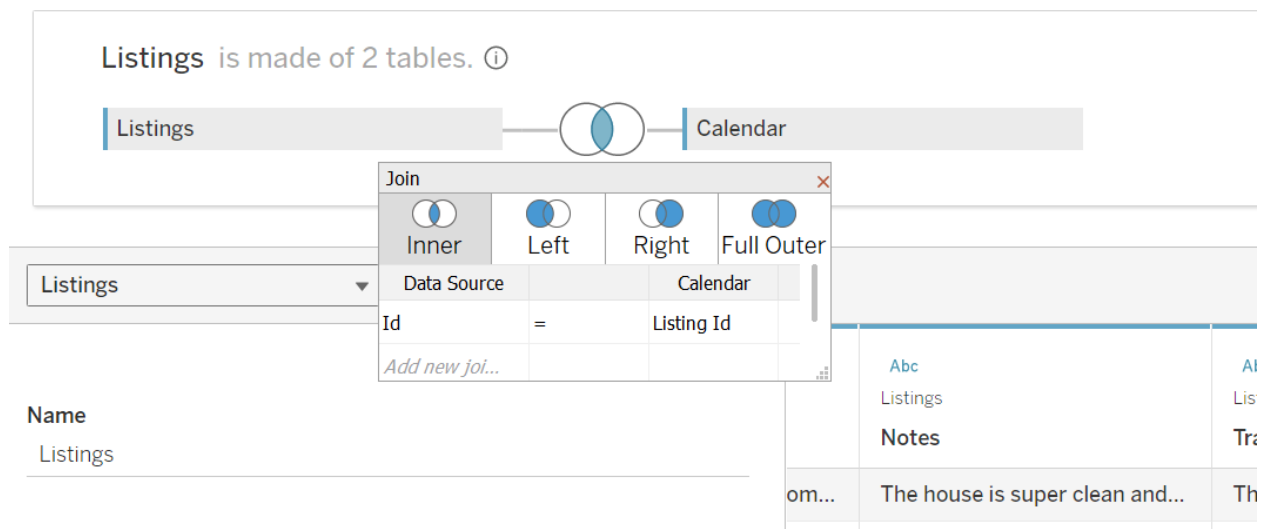

go to new worksheet and do this and get employee name and employee salary

As a DA u should be able to analyze all the data in diff sheets and come to some conclusion

Import data automatically and then put listings that side open and join with other 2 things

Listings+ (Tableau Full Project)

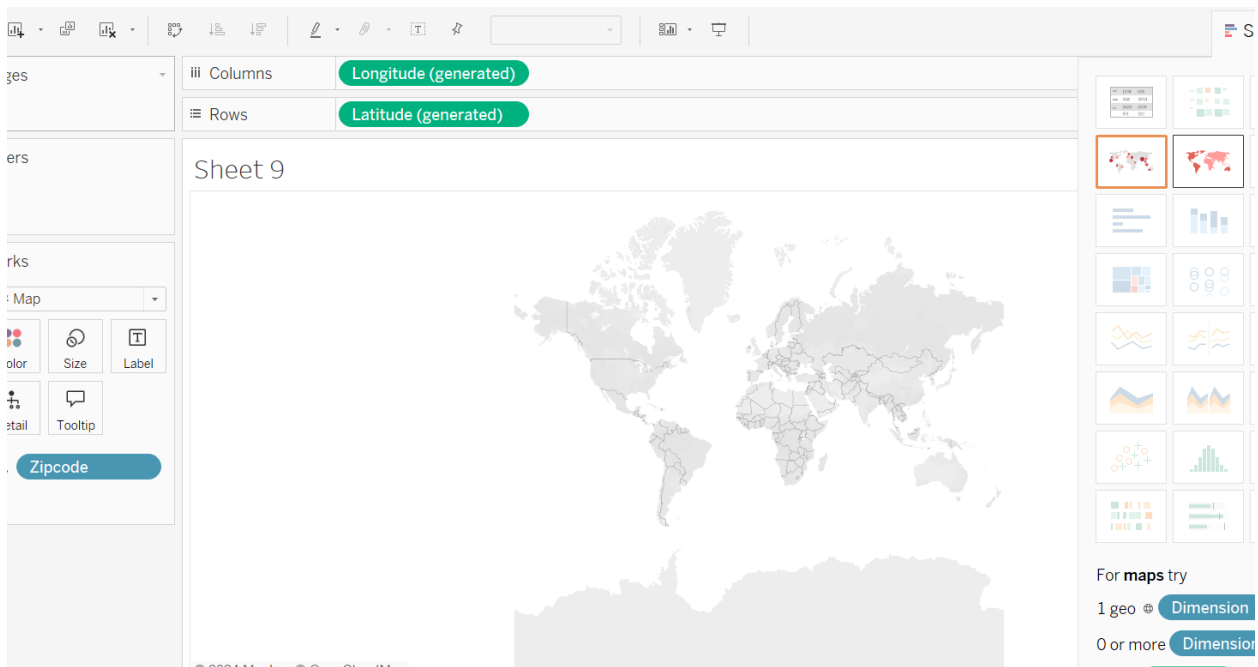

Listings is made of 3 tables. ⓘ

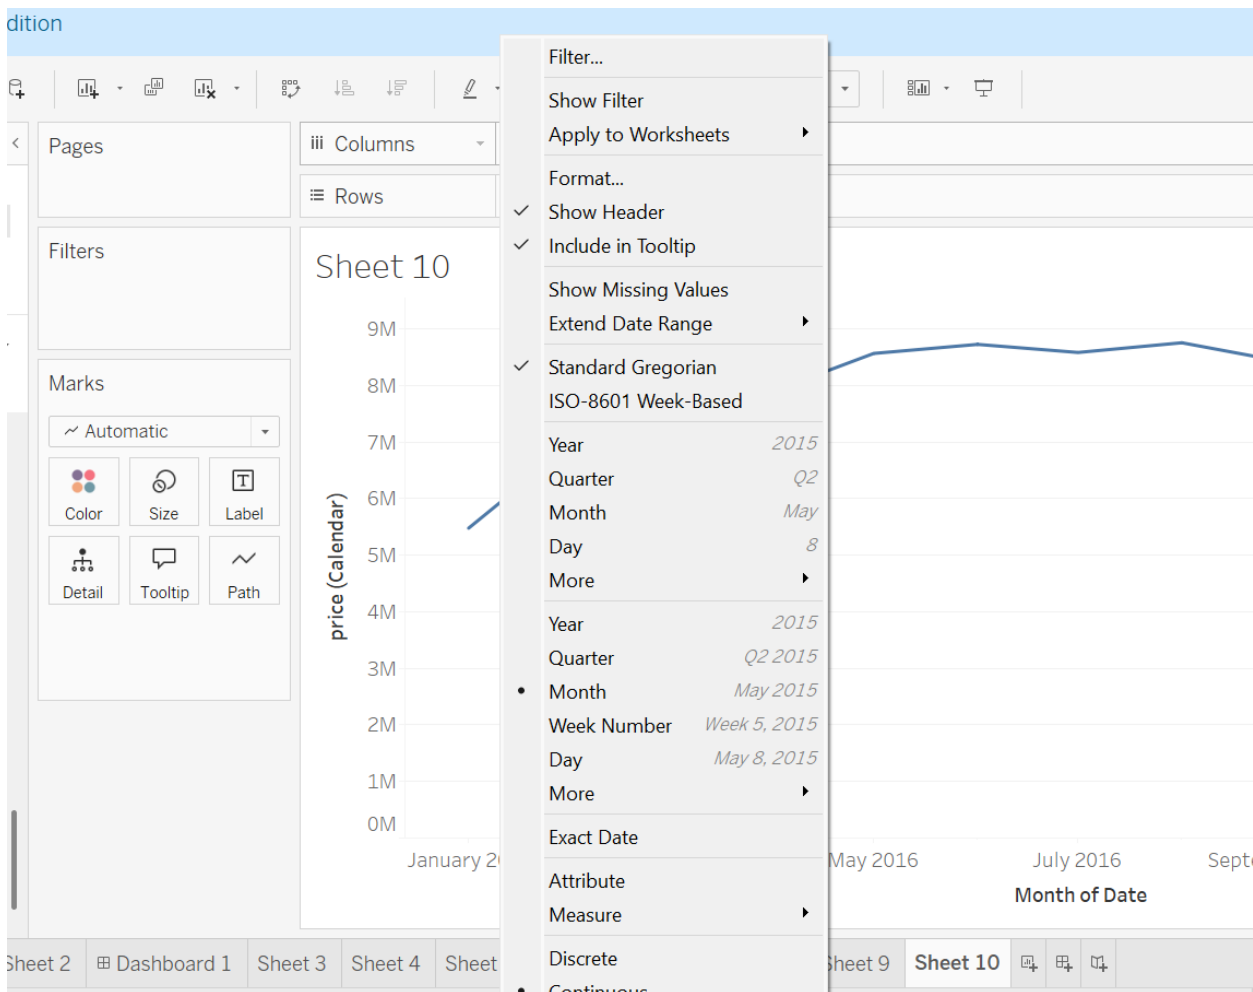

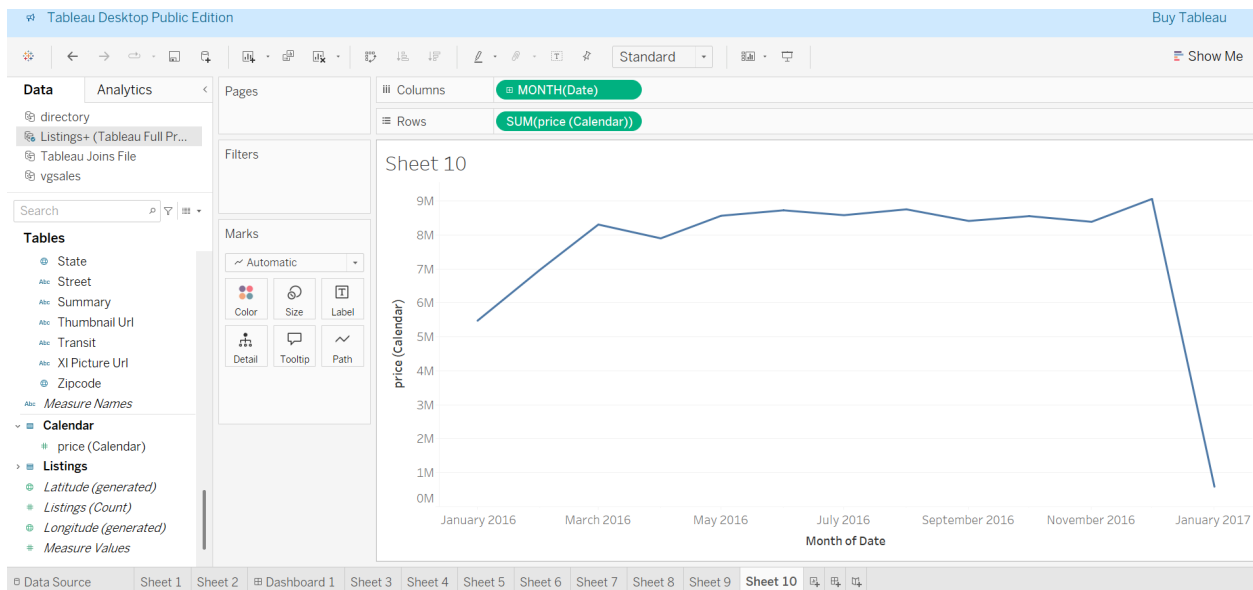

The diagram illustrates a data model where a 'Listings' table is joined with 'Calendar' and 'Reviews' tables. The 'Join' dialog box shows an inner join between 'Listings' (Id) and 'Reviews' (listing id ...). Below the dialog is a table preview for 'Listings' with 102 fields and 23733110 rows.

Name	Notes	Transit	Thumbnail Url
Free Zone 21 Parking. There ...	On a map it looks like the buil...	https://a2.mus	

Just see how many rows are matching if it is significantly large it is clear indication that u can match that col of one sheet to another col also check for multiple cols

Now open tableau and join listings and calendar with inner join and

For month/year you can add filters to get the exact range

Another is price v/s bedroom graph
