```
#API = Application Program Interface  
#acts as an interface between 2 applications which are talking  
#API is like an middle men which allows u to take only certain part of data  
#which company wants to give  
#coinmarketcap website crypto api get ur api key  
#api documentation imp thing to do  
#use python code in website  
#This example uses Python 2.7 and the python-request library.  
#change domain which is in api documentation and use api as per that
```

```
